

Part Number: 56T761-001

Part Description: Turbine case cooling air valve control cable

## Specifications

|                              |                      |
|------------------------------|----------------------|
| Product Families:            | Harnesses            |
| Product Group:               | Engine Systems       |
| Part Number                  | 56T761-001           |
| Root Part Number             | 56T761-001           |
| ATA Chapter 2 Digit          | 75                   |
| ATA Chapter 4 Digit          | 75-24                |
| ATA Chapter 6 Digit          | 75-24-13             |
| MFR / Manufacture -CAGE Code | Aero Controlex Group |
| Application                  | Unassigned           |

## Repair

|                      |                                              |
|----------------------|----------------------------------------------|
| Part Number          | 56T761-001                                   |
| Description          | Turbine case cooling air valve control cable |
| Repair Manual- CMM   | CMM                                          |
| Bench Check & Advise | Yes                                          |
| Repair               | Yes                                          |
| Repair Facility      | Hialeah                                      |

## Logistics

|             |                                              |
|-------------|----------------------------------------------|
| Part Number | 56T761-001                                   |
| Description | Turbine case cooling air valve control cable |

From sophisticated composite repairs for nacelles and stabilizers to intricate nose-to-tail flight control overhaul, 630 Aerospace offers a full range of services and payment approaches that accommodates each customer's mission requirements, business needs, and financial goals.
